Autism Spectrum Disorder (ASD)

Assessments for Adults

Feel to Heal Psychology is excited to offer comprehensive ASD assessment services for adult clients, with our team of qualified Psychologists.

Which assessment tools are administered for an adult ASD assessment?

1. Clinical Interview with the adult client
2. Autism Diagnostic Observation Schedule – 2nd Ed. (ADOS-2)
3. Adaptive Behaviour Assessment System – 3rd Ed. (ABAS-3)
4. Social Responsiveness Scale – 2nd Ed. (SRS-2)
5. Examination of previous school and/or assessment reports

What appointments will be scheduled for an adult ASD assessment?

1. Intake session (50 minutes)
2. Testing session (120 minutes)
3. Report feedback session (30 minutes – *optional service*)

What happens after the adult ASD assessment is completed?

All findings are presented to the client in a comprehensive psychologist report. The report will include any confirmed diagnoses, if applicable. We also offer an optional feedback session to discuss your report in further detail.

What are the next steps?

To discuss client suitability and availability for upcoming appointments, please contact our friendly reception team via the contact details provided.
